PRIMARY CONTACT OR AGENT FOR MAIL & REPORTING:

**LOYD C SINDEL
2242 NEWPORT CT
DISCOVERY BAY, CA 94514**

Source Name: EAST FORK RUSSIAN RIVER

Tributary To: RUSSIAN RIVER

County: Mendocino

Diversion Within: NE1/4 of NW1/4 Section 20, T17N, R11W, MB&M

Year of First Use: 1957

Parcel Number:

A. Water is used under: Riparian claim ☒ Pre 1914 right _____ Other (explain): _____

B. Year of first use (Please provide if missing above) _____

C. Amount of Use - Enter the amount (or the approximate amount) of water used each month.

Amounts below are: Gallons <input checked="" type="checkbox"/> Acre-feet _____ Other _____													Total Annual
Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	
2001			2,400,000	3,600,000									
2002			2,400,000	3,600,000									
2003			2,000,000	3,000,000									

D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation _____ acres; Stockwatering _____; Domestic _____;

Other (specify) FLOOD PROTECTION OF VINEYARD 24 ACRES

E. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES ___ NO ___

Describe any water conservation efforts you have initiated: _____

b. If credit toward beneficial use of water under claimed pre 1914 appropriative water right for water not used due to a conservation effort is claimed under section 1011 of the Water Code, please show the amounts of water conserved:

Reductions in Diversions:

yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)

Reductions in consumptive use:

yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)

I have data to support the above surface water use reductions due to conservation efforts. YES ___ NO ___

AUG 3 2004

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES ☐ NO ☒
- b. If credit toward use under a claimed pre 1914 appropriative water right through substitution of reclaimed water, desalinated water or polluted water in lieu of appropriated water is claimed under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of reclaimed water used:
- yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)
- I have data to support the above surface water use reductions due to wastewater reclamation. YES ☐ NO ☐

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES ☐ NO ☒
- b. If credit toward use under a claimed pre 1914 appropriative right through substitution of groundwater in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:
- yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)
- I have data to support the above surface water use reductions due to conjunctive use efforts YES ☐ NO ☐

I understand that it may be necessary to document the water savings claimed in "F." above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to 1) store water for later use 2) divert water which originates in a different watershed 3) divert water released from storage, or 4) divert return flows from groundwater use.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and per-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Right in California and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

Lloyd C. Sindel and
Ila F. Sindel
2242 Newport Court
Byron, CA 94514

Dear Mr. and Mrs. Sindel:

LICENSE 7044 (APPLICATION 16472); LICENSE 11647 (APPLICATION 24318);
AND STATEMENT NO. S8184 EAST FORK RUSSIAN RIVER IN MENDOCINO COUNTY

This is to follow up several recent phone conversations with Lloyd Sindel concerning the above-referenced water rights.

A brief summary of our records of your water rights is provided below:

License 7044 (Application 16472)

For appropriative water rights, the priority for water in a water-short year is established by seniority using the filing date. Application 16472 was filed on July 19, 1955. The project was licensed in 1964 under License 7044 (copy enclosed) which allowed up to 0.9 cubic foot per second (cfs) to be diverted from the East Fork Russian River from April 1 to October 1 for irrigation of up to 88 acres. In 1975, due to a parcel split, we were informed that the water right was to be shared among several parties (currently four parties consisting of seven owners on six parcels) with a total acreage reduced to 72.65 acres. The diversion rate and season were not changed.

In 1975, your share of the water right covered by License 7044 was determined to be a diversion rate of 0.282 cfs for irrigation of 23.41 acres, with a diversion season of April 1 to October 1.

We track the actual amount of water used by distributing a pre-printed Report of Licensee for License 7044 on three-year intervals. The Reports are currently completed by Potter Valley Community Unified School District, the "agent" of record for all owners of License 7044.

END
1-25-96

Loyd C. Sindel and
Ila F. Sindel

-2-

As we discussed, I am reviewing the feasibility of dividing License 7044 into separate licenses reflecting current property ownership. We do not charge any fees for license division if there are no significant changes to the location of the point of diversion or place of use. Any proposed license division will be addressed in a future letter to all owners of record.

License 11647 (Application 24318)

Application 24318 was filed on March 9, 1973 and License 11647 (copy enclosed) was issued on January 11, 1985. License 11647 was for frost protection use of up to 2.22 cfs by direct diversion from March 15 to May 31.

The license also has a term associated with minimum bypass flows for protection of fish and wildlife in East Fork Russian River. The minimum bypass flow from March 15 through May 14 is 35 cfs and from May 15 to May 31 is 75 cfs. The river flows are measured at the U.S Corps of Engineers streamflow meter on the East Fork Russian River at Cold Creek.

Actual water use for frost protection should be reported on the pre-printed Report of Licensee for License 11647 which we distribute to you on three-year intervals.

Statement No. S8184

You have also filed a form claiming a riparian water right for your property. A riparian right usually comes with ownership of land bordering a stream, lake, or pond. Riparian land owners may use of part of the natural flow of the water body directly for beneficial use on riparian land without filing for a permit, license, or governmental approval. A valid riparian right is a vested right that is generally superior to any appropriative right administered by the State Water Resources Control Board.

The Mendocino County Assessor's records shows your property as Parcel No. 175-120-18 which does not appear to be physically riparian to the East Fork Russian River. Therefore, any claim of riparian right to the East Fork Russian River for Parcel No. 175-120-18 would have to be based on chain of title. The validity of a claim of riparian right often involves complex issues of fact and law regarding stream contiguity, stream natural flow, land ownership issues, and chain of title. As a result, it is our policy not to render any advisory opinions regarding the validity of a specific claim of riparian right.

Loyd C. Sindel and
Ila F. Sindel

-3-

However, we do track actual use of water under a claim of riparian right by requiring the filing a "Statement of Water Diversion and Use" (Statement). In 1973, you filed a Statement (copy enclosed) which was subsequently assigned a unique number of S8184. Thereafter, we distribute pre-printed Supplemental Statement forms at three-year intervals for the you to summarize your actual water use under claim of riparian right.

If you have any questions, please write or telephone me at the above number.

Sincerely,

ORIGINAL SIGNED BY
